Workplace & More*

Welcome to Green Together

Your Guide to Smarter, Greener Workspaces

Creating smarter, more sustainable workspaces starts when everyone works together. When employees, facilities teams, and leadership make even one thoughtful choice, such as selecting eco-conscious products, reducing waste, or supporting healthier cleaning practices, those actions make a lasting impact. Together, organizations can build environments that reflect shared values and make sustainability part of everyday work.

Know Your Green

Key certifications that make a product truly eco-friendly

Indicates products have undergone rigorous, third-party testing to certify reduced environmental impact across their lifecycle.

Products are compostable in commercial composting facilities, ensuring they break down safely without leaving harmful residues.

Certifies products made with renewable, plant-based materials, reducing reliance on petroleum.

Wood and paper products sourced from responsibly managed forests that protect forests, workers, and communities.

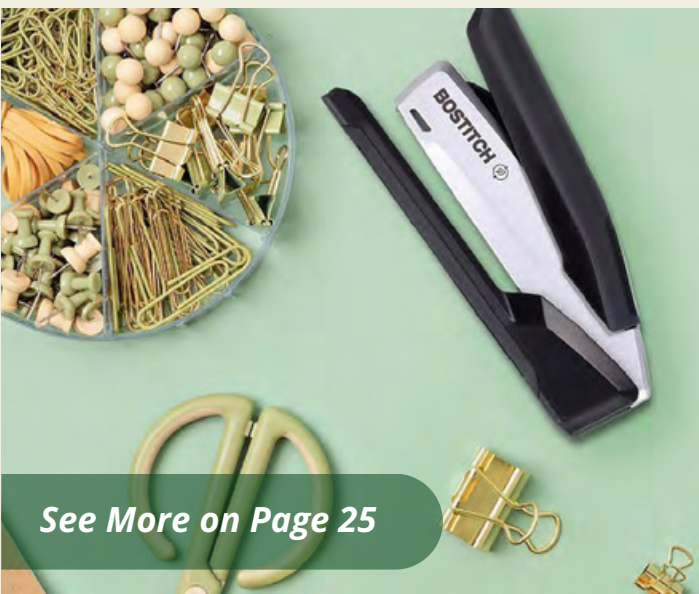

Products that meet strict health, toxicity, packaging, and sustainability standards across their lifecycle.

An EPA Pollution Prevention program recognizing products that reduce pollution by using safer ingredients.

**To Transform the World into a Healthy, Sustainable,
and Equitable Place for the Next Seven Generations.**

Top 5

Sustainability Programs

Thrive™ by Kimberly-Clark Professional™ **From wasteto energy.**

Used qualifying dispensers and wipes are diverted from landfills and converted into alternative fuel. Fully traceable and easy to report.

Best for: Facilities looking to reduce landfill waste fast.

K-Cycle® byKeurig® for Business **Every cupcounts.**

Used K-Cup® pods are collected, separated, and recycled. Grounds become compost. Materials get reused.

Best for: Spaces with heavy coffee demand.

Call2Recycle® — Energizer® Batteries **The right way to recycle batteries.**

Safely recycle used batteries and reduce fire risk with an easy, well-known program supported by Energizer®.

Best for: Those looking to responsibly dispose of removable batteries.

Lavazza x TerraCycle® **Coffee, recycled.**

Hard-to-recycle coffee capsules and packaging are collected and repurposed through TerraCycle®. Over 156 million Flavia Freshpacks recycled.

Best for: Breakrooms that don't want coffee waste going to landfill.

HP Planet Partners **Print. Recycle. Repeat.**

Free recycling for used ink and toner cartridges. Over 1 billion recycled globally with zero landfill waste.

Best for: Offices with high print volume.

Contact us to get started on these sustainability programs.

A Greener Breakroom Starts Here

Eco-Products
12 oz World Art Plastic
Hot Cups - BPI & FSC
Certified; Plant-Based

ECOEPBHC12WA -
50/PK, 20/CT

Vegware
Compostable Plant-Based
Takeout Containers

VEGVWHC81NFA - 200/CT

Dixie Ultra
Interfold 2-Ply Napkin Dispenser
Refills - SFI, EcoLogo, BPI & USDA
Certified Bio-Based

GPC32006 - 24/CT

Dixie Ultra
Tabletop Interfold One-At-A-Time
Napkin Dispenser

GPC54527A

Genuine Joe
6" Compostable Sugarcane
Plates - No Harmful PFAS

GJO02042 - 50/PK

PFAS-Free

What it Means:

Madewithout Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS), a class of human-made chemicals commonly used to resist heat, water, and grease that are known to pose potential health risks.

How it Helps:

- Reduces long-lasting chemical pollution
- Supports safer materials without persistent toxins

A Greener Breakroom Starts Here

Flavia
Starbucks Pike Place Roast

PeakServe Mini Continuous Paper Hand
Towel Dispenser - ClimatePartner Certified

TRK552538

Marcal
100% Recycled 2-Ply Paper Towels
- Green Seal Certified

MRC6709 - 15/CT

Seventh Generation
100% Recycled 2-Ply Paper Towels -
FSC Certified

SEV13737 - 6/PK

**100% Recycled Fiber
Hard Roll Paper Towels**

Eco-Conscious Can Liners for Every Facility

**Stout
EcoSafe 48-Gallon
Compostable Trash Bags**

STOE4248E85 - 40/BX

**Earthsense
13-Gallon Reclaim Heavy-Duty Can Liners
- Made of 75% Recycled Content**

WBIRNW1K150V - 150/BX

**Nature Saver
60-Gallon Low-Density Can Liners -
Made with Recycled Materials**

NAT00991 - 100/BX

Compostable

What it Means:

The product can break down into nutrient-rich compost in either home or commercial composting settings (depending on the product).

How it Helps:

- Returns nutrients to soil
- Less waste, more renewal
- Breaks down naturally

Green Together

How Sustainable Choices Bring People Closer

Being “Green Together” means recognizing that sustainability is a collective journey.

In workplaces and public spaces, sustainability has become a shared language. A way for organizations to connect people around purpose. As more facilities embrace greener cleaning, healthier environments, and responsible product choices, “Green Together” reflects a growing movement that unites teams, colleagues, and communities.

Across offices, schools, healthcare centers, and manufacturing sites, people want to feel that their spaces are cared for and that the products used daily reflect their values. Eco-friendly cleaning solutions, along with responsibly designed office products and furniture, help create healthier spaces by supporting safer materials and cleaner indoor environments.

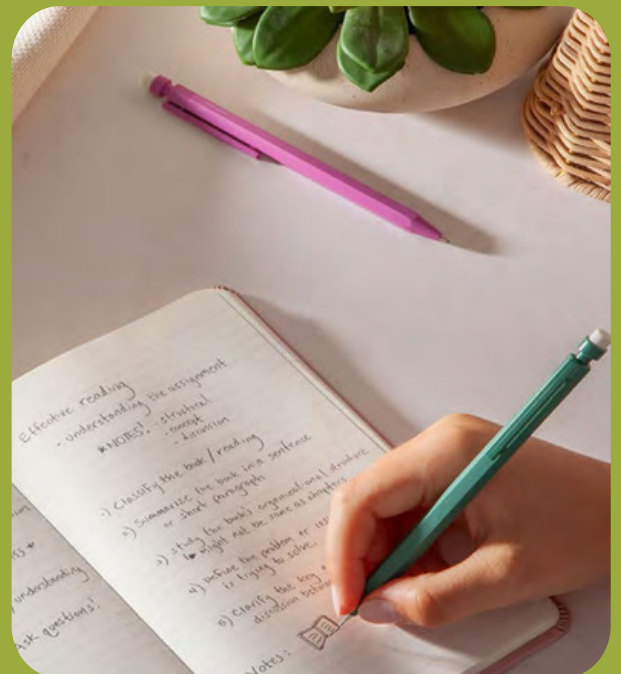

Technology continues to elevate this shared mission. Smart dispensers reduce waste and improve consistency, while modern floorcare solutions cut energy use without sacrificing performance. Furniture and workspace solutions made with recycled or sustainably sourced materials build environments that inspire pride and reinforce purpose.

Being “Green Together” means recognizing that sustainability is a collective journey. Every choice from a disinfectant to a desk chair, shapes a culture that values people and the planet. When facilities choose greener paths, they’re not just improving their spaces. They’re strengthening the connections that bring their communities together.

Green cleaning also creates opportunities for collaboration. Facilities teams and staff can work together to adopt safer chemicals, reduce waste, and rethink how spaces are maintained. Tools like color-coded microfiber, touch-free dispensing, and concentrated chemical platforms make sustainable practices easier and more efficient. Even small choices such as recycled-content paper, refillable writing tools, or energy-saving technology give everyone a role in supporting a greener environment.

The impact extends far beyond the building itself. Reduced chemical exposure, cleaner indoor air, and materials with lower environmental footprints support healthier, more comfortable spaces. And when people feel good about where they work, they feel more connected to the broader community as well.

Sustainable Cleaners That Perform

**Seventh Generation
All Purpose Cleaner - USDA
Certified Bio-Based; 100% Post-
Consumer Recycled Bottle**

Sustainability at every step. From products to process.

98%*

of our paper-based labels are made with materials certified to sustainable sourcing standards (FSC®, SFI®, PEFC®).

86%*

of our paper labels feature a recycle-friendly adhesive.

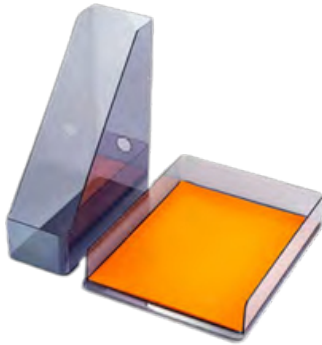

95%*

of our non-label paper based products (dividers, cards, and tags) use sustainably sourced paper.

- Avery's retail products are printed using water-based, UV, or UV-LED inks—never solvent-based inks
- Select labels are made with 100% recycled paper, including matte white and kraft
- Our EcoFriendly line includes dividers and badges made from 100% recycled paper
- All binder boards are constructed using 100% recycled paper

*Recyclability and sustainably sourced claims are based on our company's internal assessments and methodologies, have not been independently verified or third-party certified, and may vary depending on local recycling capabilities, sourcing practices, and product type. Information current as of August 2025.
